

**Florence Jallah**

**Hartford**

**PCA**

**Support 5433**

**My name is Florence and I am a PCA living in with my consumer which I love because I love taking care of people. But I find the system not really working because during the time of my consumer being in the hospital payment is stopped and at that time I am unable to take care of some responsibilities. And the hours are not enough to take me through.**

**I really support the union because if things work it will better for both the consumer and I. In a sense, the consumer will better be taken care of, and PCA will have days off and medical.**
